

## **Welcome to the ISONAS Pure Mobile App User Guide**

The ISONAS Pure Mobile App is a cutting-edge solution designed to simplify and enhance your access control experience at Oakwood University Church. By using your smartphone as a virtual key, the Pure Mobile App provides a secure and convenient alternative to traditional Key Fobs, making access seamless and hassle-free.

The following steps are designed to help you get the most out of your mobile telephone digital key.

### **Key Features of the ISONAS Pure Mobile App:**

- **Convenience:** Replace your physical key fob with your smartphone.
- **Ease of Use:** Intuitive setup and operation, even for first-time users.
- **Enhanced Security:** Leverage the latest in mobile technology for secure access.
- **Versatility:** Compatible with most ISONAS access control systems.

With the ISONAS Pure Mobile App, managing access control has never been easier or more secure.

## Step 1

If you have an Apple iPhone go to the Apple App Store

OR
